

Where the Conversion Leaks Are

allbirds.com · CRO Recommendations · August 2026

The single most valuable conversion mechanism on this site is the homepage hero's ability to guide visitors to a clear, primary action. Currently, the hero presents multiple competing CTAs ('Shop All', 'Shop Womens', 'Shop Mens', etc.) without a single primary focus, diluting user attention and increasing cognitive load. This is bleeding value by preventing visitors from quickly finding the most relevant product category, thereby reducing the likelihood of immediate engagement and purchase.

9	Missing product reviews The product page lacks visible review count or rating, which is a critical trust signal for a \$16 sock...	High	Medium	4/10
10	Controls without accessible names 21 of 69 buttons expose no text label, so screen readers and voice control cannot address them and the...	High	Low	2/10

How to read this

Findings marked **verified** were measured directly and are reproducible. Everything else is a hypothesis derived from inspecting the live pages, which is why the PXL evidence questions score zero for those items. Sized opportunities describe the prize if a change works, not expected revenue: roughly 10–30% of A/B tests produce a significant win, and winners tend to overstate their true effect.
